Computer Support

As professionals gain experience and expertise, they may progress to roles like Desktop Support Engineer, IT Support Analyst, or Systems Administrator. Salaries for mid-level positions typically range from \$50,000 to \$80,000 per year.

Computer support professionals who interact directly with clients or customers, such as Technical Support Specialists in customer service-oriented industries, may receive additional compensation. The computer support industry provides opportunities for career growth, and professionals can increase their earning potential by gaining experience, obtaining certifications, and staying current with industry trends
