Health Information Coding Diploma Sample Academic Track

Credits required for graduation: 48

The Health Information Coding diploma prepares students to perform comprehensive analysis and review of health records to identify relevant diagnoses and procedures. The medical coding professional is an integral part of the healthcare team that strives to provide quality patient care and correct reimbursement. Graduates will be prepared to take the exam for coding credentials offered by the American Health Information Management Association (AHIMA) or the American Academy of Professional Coders (AAPC).

Medical Coding

Completing the required 48 credits for graduation prepares the student for medical coding in both inpatient and outpatient scenarios.

Medical coding follows strict guidelines and state and federal regulations. The student is able to grow in this profession with coding credentials and microcredentials from AHIMA or AAPC.
