## Surgical Technology – Degree Sample Academic Track

Credits required for graduation: 70

The mission of the Surgical Technology Program at Albany Technical College is to prepare students for employment in hospitals and clinics as integral members of the surgical teams. The program will provide a comprehensive education based in a combination of psychomotor skills, cognitive knowledge, and affective behavior while integrating technology to support learning. It is the purpose of the program's staff to provide these learning opportunities, which introduce, develop, and reinforce academic occupational knowledge and hands-on specialty skills, and attitudes required for success in acquiring, retaining, and advancing in this field. It is our purpose to meet the specific needs of the community as well as economic growth and development to the citizens of the state by providing students with specific surgical skills to deliver quality surgical patient care.

Surgical

COMPLETE 5 SEMESTERS

### Technology

A surgical technology degree offers substantial earning potential. According to data from AST in 2022, the median pay for surgical technologists in Georgia is \$50,150 per year or \$24.11 per hour.

By completing the programs required 70 credits, it provides the graduate the opportunity to sit for the national certification exam and become a competent surgical technologist in the modern surgical technology profession.
