

Cybercrime Investigation Degree Sample Academic Track

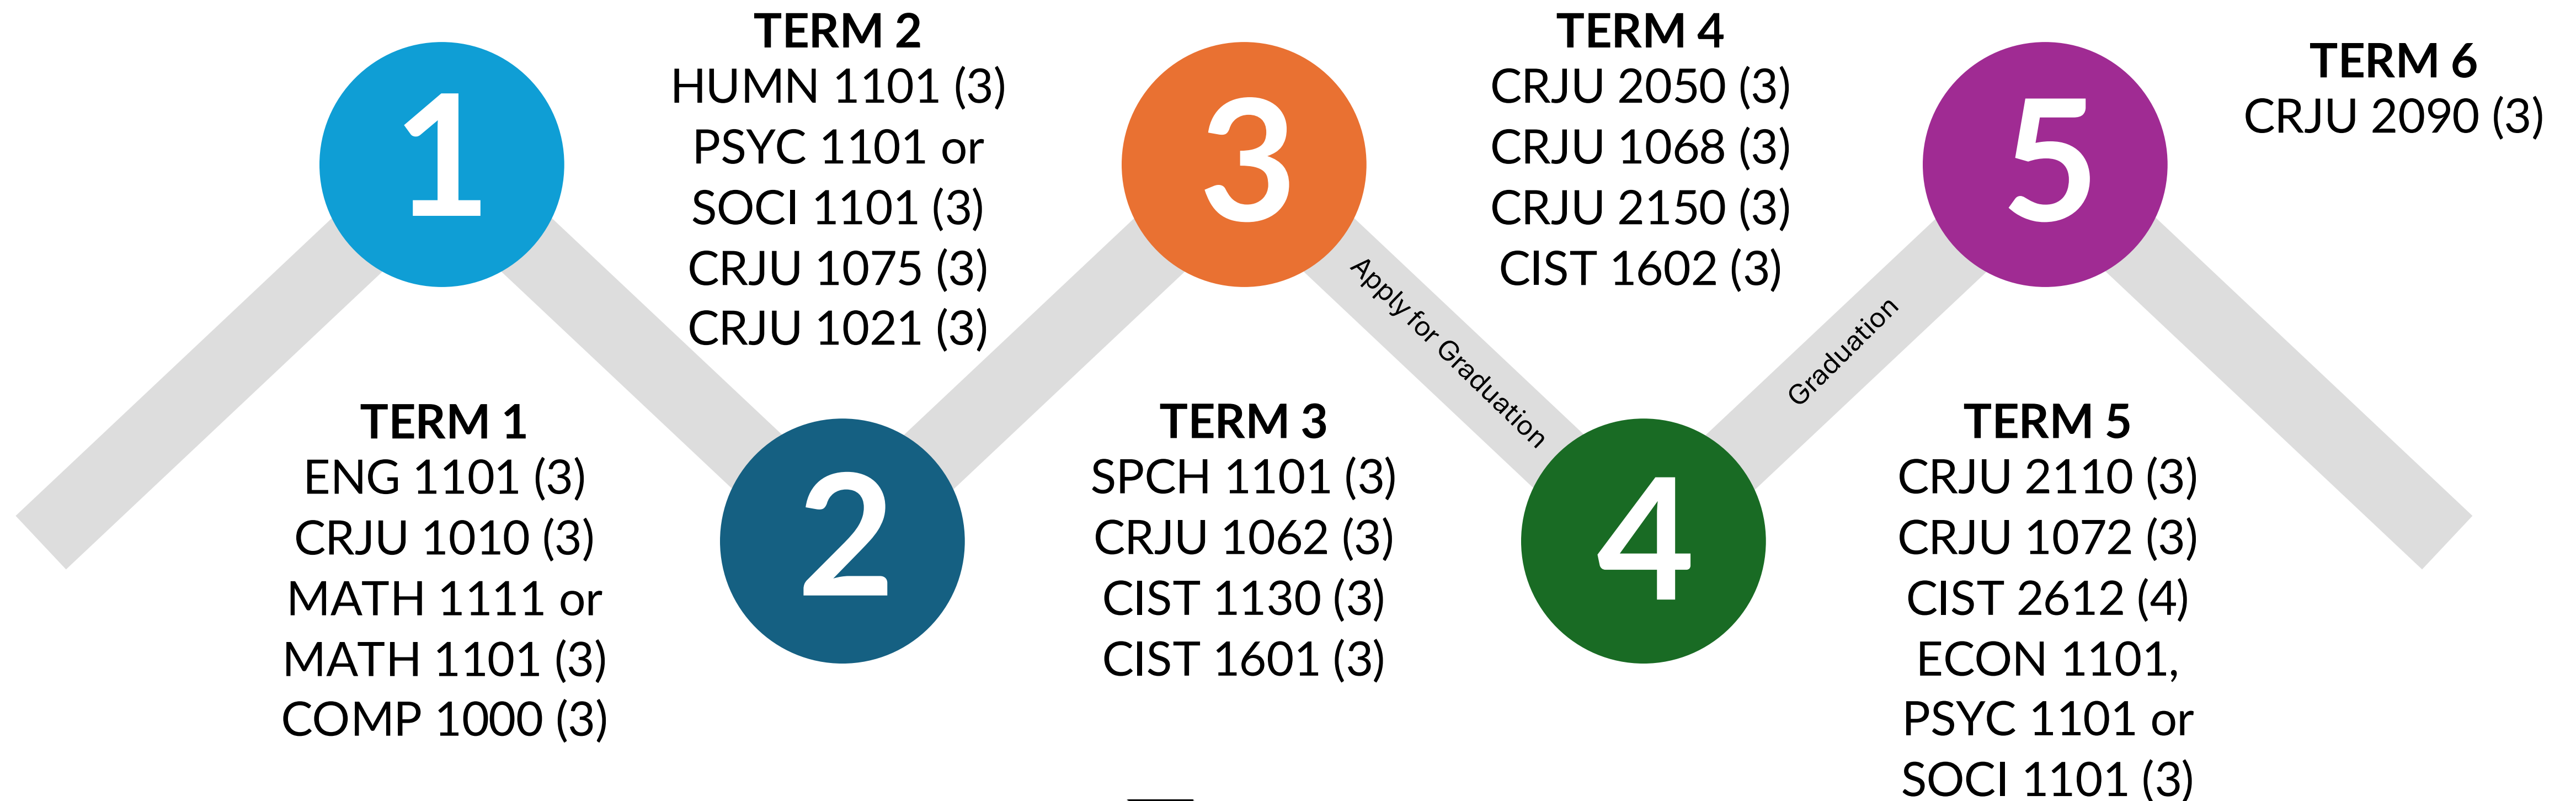

Credits required for graduation: 64

Cybercrime is increasingly prevalent in our technology-dependent society and in order to effectively combat it, criminal justice professionals need more than a layman's understanding of hacking, spam, worms, malwares and computer viruses. Coursework in this curriculum focuses on helping students understand the nature of these types of threats, along with the tools available to mitigate and investigate computer crimes. Graduates with a Cybercrime Investigation A.A.S. degree also may decide to pursue a bachelor's in criminal justice at a four-year institution.
