Associate of Science in Nursing –Degree Sample Academic Track

Credits required for graduation: 69

Associate of Science in Nursing Program prepare program graduates to write the National Council Licensure Examination to become registered nurses. The program curriculum combines general education and nursing education. Consistent with the mission of Albany Technical College, program faculty support lifelong learning and workforce development through faculty efforts in continuing education and community service. The Associate of Science of Nursing program mission is to educate and prepare a diverse body of students to become safe, competent, and caring Registered Nurses for entry-level positions in the college's service area while cultivating professionalism, an appreciation for other peoples and cultures, and a desire for life-long learning.
