

Design and Media Production Technology – Photography Diploma

Sample Academic Track

Credits required for graduation: 47

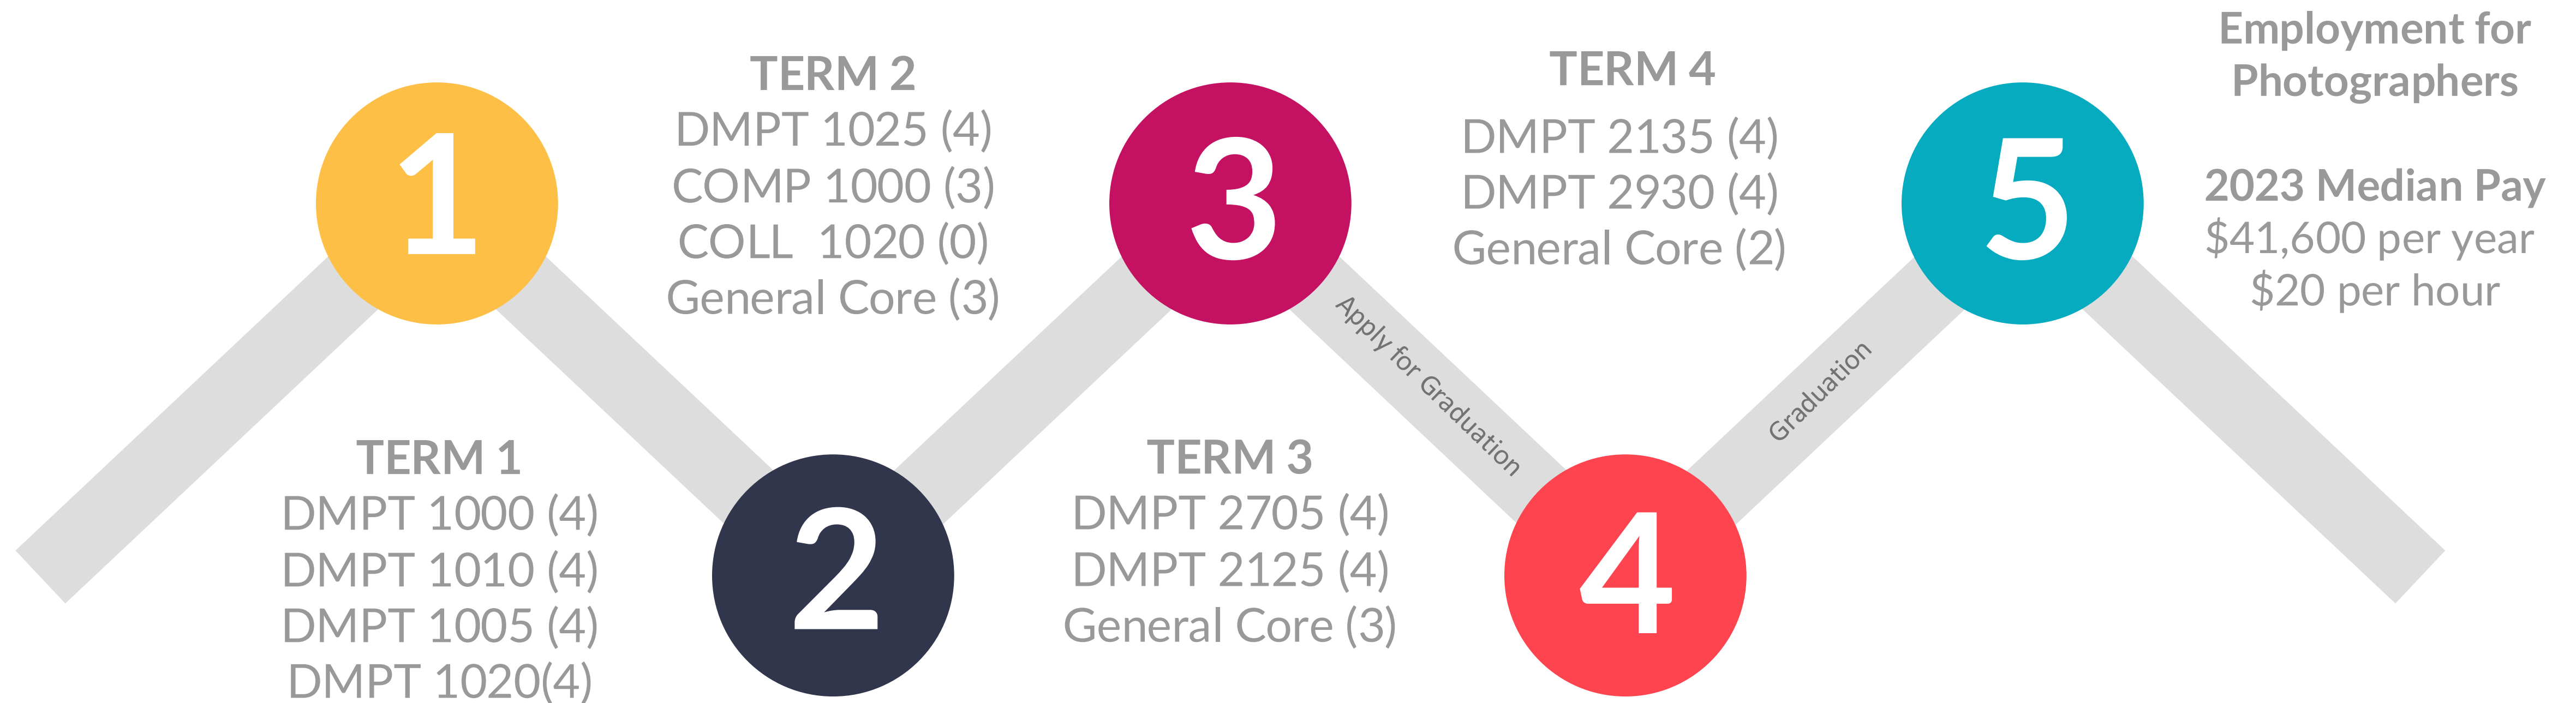

The Design and Media Production Technology Program's Photography diploma provides quality education and training through methods of instruction that equip students with the necessary skills for entry-level employment as a photographer. It offers students a foundation to help build their creative thinking and visual communication skills using industry standard software and equipment. Its focus is on artistic vision, technical knowledge of cameras, and understanding lighting techniques, helping students prepare for employment in publishing, advertising, public relations, marketing, and related service industries.
