Information Technology Professional Degree Sample Academic Track

Credits required for graduation: 65

Information Technology Professional

Individuals with an IT Professional Degree salaries can vary widely but often fall within the range of \$70,000 to \$100,000 or more per year. IT professionals who specialize in areas such as cybersecurity, cloud computing, data science, or artificial intelligence may command higher salaries. Specialized roles often come with increased responsibilities and a demand for specific skills. Salaries for these positions can exceed \$100,000, with some earning well into six figures.

An IT degree opens doors to various career paths, including software development, network administration, database management, IT consulting, and project management. Graduates can pursue roles with increasing levels of responsibility and leadership.
